FLAT PAINT BRUSHES

81267 EVO

81333 EVO PROFÍ

RADIATOR BRUSH EVO PROFÍ

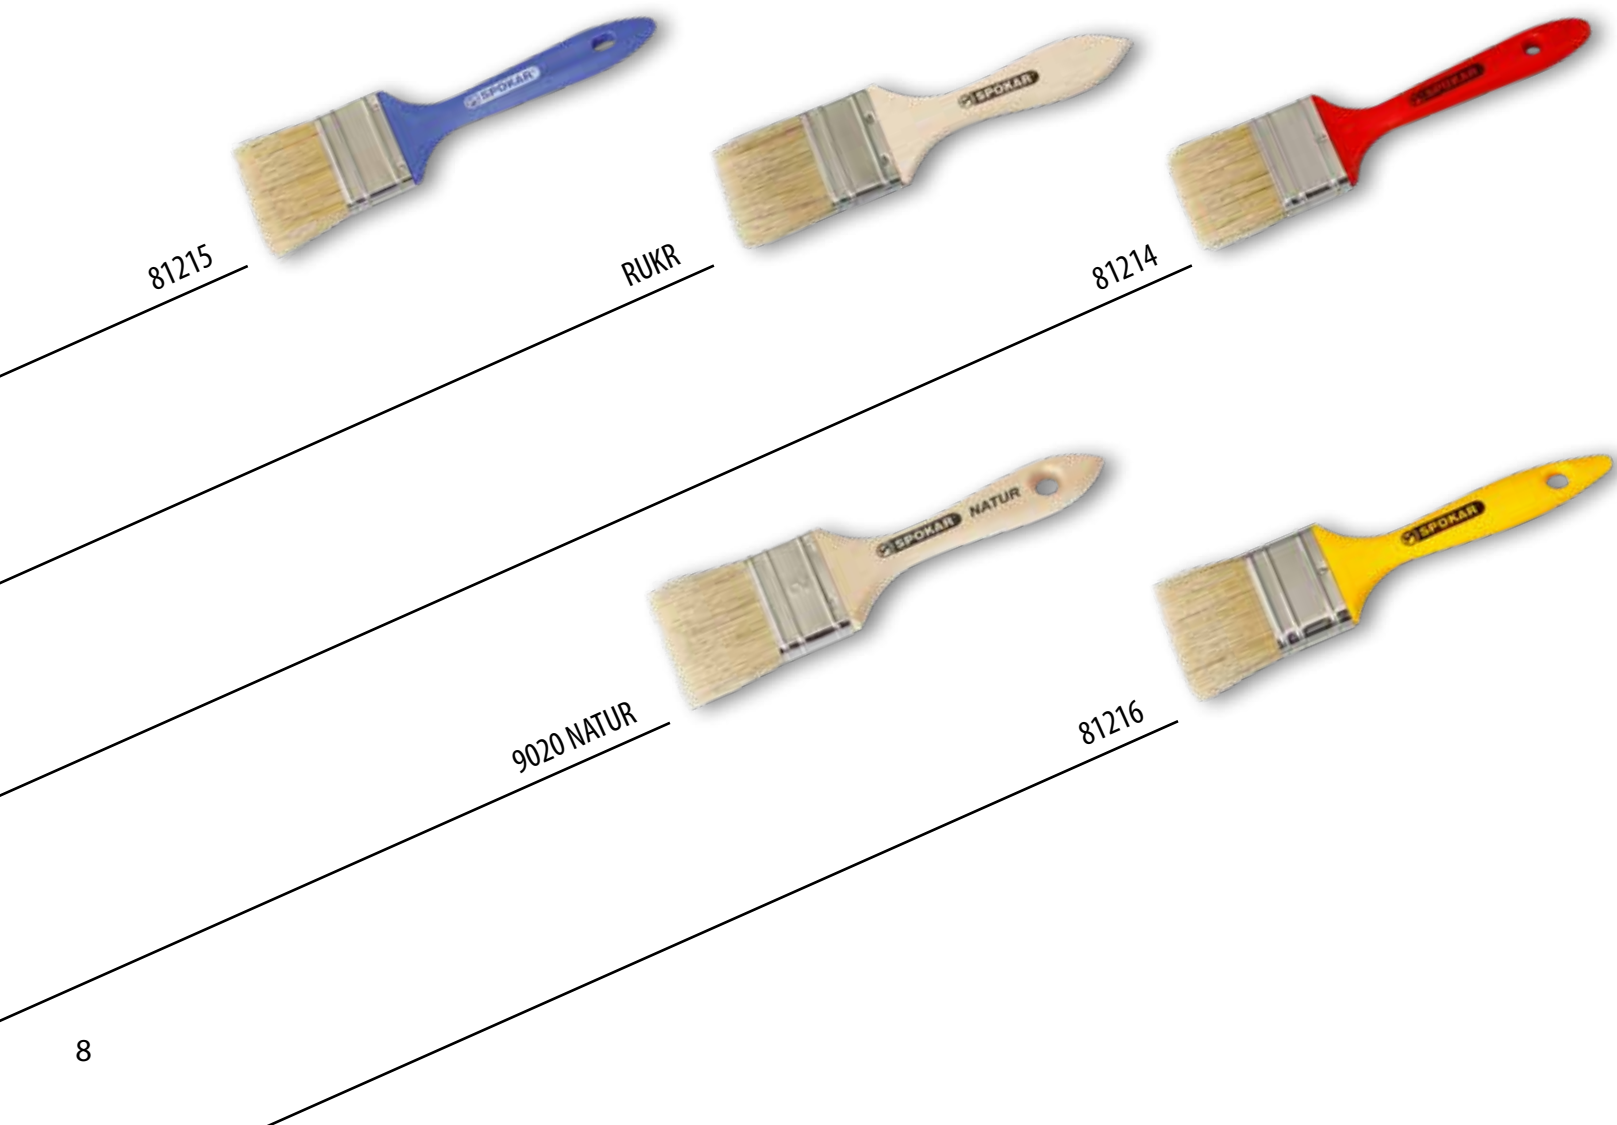

BRUSHES EVO

The EVO brushes are fitted with unique hollow synthetic fibres with a full-length conical shape and very fine flagged ends. These fibres, which are the result of the latest technical development, suck the paint perfectly and effectively spread it into a completely even, smooth compact layer. They provide excellent results by applying paints of all kinds and consistencies.

FLAT PAINT BRUSHES

BRUSHES FOR UNIVERSAL USE

These brushes are fitted with a mix of natural bristle and hollow synthetic fibres with pointed ends. The bristle guarantees good water absorption, the synthetic fibres stabilize the shape and their pointed ends help to spread the coating evenly. It allows using for all kinds of paints and varnishes.

Brushes fitted with 100% natural bristle are especially suitable for low density solvent paints, impregnating oils and other colors where good absorbency is particularly important.

LAZUR BRUSHES

Lazur brushes are designed for applying glazing paints to wood. They are fitted with a mix of synthetic fibres, which contain X-profile fibres or natural bristle for good paint absorption. The fibre ends are pointed for good paint spreading. The fibres are stiffer, which helps to work in the glazing paint intensively into the wood surface.

CEILING BRUSHES

CEILING BRUSHES

Ceiling brushes are designed for application of all kinds of wall paints, lime and penetration coatings.

The EVO ceiling brushes are fitted with hollow synthetic fibres with a full-length conical shape and very fine flagged ends. These fibres perfectly absorb the paint and effectively spread it into a thin, even, smooth layers.

Other ceiling brushes are fitted with a mix of natural bristle and hollow synthetic fibres with pointed ends.

PAIN T ROLLERS

VARNISHING ROLLERS

Paint rollers for varnishing are available as mini-rollers, midi-rollers and floor rollers for large areas. The working surface is made of polyurethane foam (moltopren) or various kinds of pluses.

MINI-ROLLERS MOLTOPREN

Moltopren rollers are made of a special polyurethane foam with a density of 30 kg/m³. They are used for water-based and synthetic paints. Not suitable for polyurethane and nitro solvents.

Core diameter 14 mm, outer diameter of the roller 35 mm.

* The roller is available also in varnishing kits (pg. 54 - 55)

YELLOW-GREEN PLUSH

Wall paint rollers are standardly available in lengths of 18 and 25 cm. In terms of construction, they can be divided into three groups:

- paint rollers are not padded, the plush is placed directly on the supporting plastic tube. They are used for work on smooth walls, especially in interiors.
- universal paint rollers have a smaller core diameter and a soft padding. They are designed for indoor use as well as for smooth and medium-rough facades.
- facade rollers have a larger core diameter, are padded and serve for medium coarse and coarse facades.

Mini and midi rollers are also available for finishing painting work in poorly accessible locations and on small areas.

PERLON

Polyacrylic cover, height of plush 12 mm. Universal use for all kinds of wall paints, especially suitable for vinyl, acrylic and dispersive higher density paints.

EXPLANATIONS

1 RECALCULATION OF ROUND BRUSH SIZES

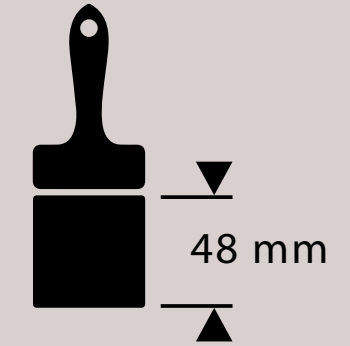

2 RECALCULATION OF FLAT BRUSH SIZES

3 VISIBLE LENGTH OF FIBERS

Determines the available fibre length in mm which is available for applying paint.

4 PACKAGING XX/YY

XXdetermines the number of pcs in the **internal** packaging
YYdetermines the number of pcs in the **external** packaging

5 FOIL: SIGN „my“

Determines foil **thickness** in unit „**micron**“ (or a micrometer)

1000 my = 1 mm

*Example: 7 my = 0,007 mm
200 my = 0,2 mm*
